Installation

All installations should meet or exceed the guidelines and specification as outlined by the TCNA.

Substrate

Should be firmly fixed, flat, clean, and free of contaminants. Deflection should be a maximum of 1/360th of the span for wall or floors. Drainage point of no less than 1:60. For wet areas a reinforced waterproof membrane is required.

Sealing

Material must be sealed before and after installation.

Grout

Only grouts suitable for joints up to 1/2" is recommend.

Laying

Butt joint only.

Adhesive

A cement based adhesive is suitable if no movement is anticipated. If slight movement is anticipated a 2 part modified cement adhesive should be used. A 1/4" notched trowel is recommended. Every pebble must be embedded in adhesive.
